Voltalia has a 24 MW project awarded during wind tender in France

Voltalia (Euronext Paris, ISIN code: FR0011995588), an international player in renewable energies, announces it had a 24 MW project awarded during the third round of the onshore wind national call for tenders held by the French Ministry for Ecological and Social Transition.

With 52 MW in operation, 49 MW currently under construction and 24 MW newly secured, Voltalia confirms its good growth momentum on the French wind market.

The awarded project is the Argenteuil-sur-Armançon wind farm. It is located in the Yonne department, in the Bourgogne-Franche-Comté region, around ten kilometers from the Sarry wind plant (22 MW), which is currently under construction and should be commissioned before year-end.

This new wind farm will benefit from a 20-year contract for difference¹. Seven wind turbines will produce enough renewable electricity to power the equivalent of circa 20,000 French households.

“This success demonstrates the competitiveness of projects developed by Voltalia and the vitality of onshore wind, a sector where we have lofty ambitions in France and abroad”, rejoices Sébastien Clerc, CEO of Voltalia.
