Development Manager (M/F)

Our **Development Department** is looking for a **Development Manager** for its **Operations**, will have the following responsibilities:

- Identify and originate project development opportunities on behalf of the business to grow a pipeline of solar PV and Wind projects throughout Spain;
- Lead the full development of the projects until the ready to build status;
- Perform technical/ financial due diligence assessments, lead deal structuring and handle commercial negotiations with local developers for greenfield development;
- Manage relationships with authorities, grid operators, regulators, market operators and other relevant stakeholders;
- Manage the full process of permitting and authorizations requested;
- Manage the grid connection process;
- Land prospection and land lease agreements negotiation with land owners;
- Coordination of the technical studies required to file the different authorizations to build and operate solar and wind farms;
- Prospection of possible local partnership to support the development;
- Support in the origination of Corporate PPAs and in the preparation of commercial and technical offers for clients;
- Project Tender participations coordination;
- Manage and interact with different external providers;
- Project planning, budget definition and follow up.

At Voltaia we are passionate about **renewable energies!** We are an electricity producer from wind, solar, hydro and biomass, and also a service provider to 3rd party clients such as **Development, EPC, O&M and Distribution.**

Today we are in **17 countries, split among 4 continents**, and offering a **global operating capacity** to our clients. We are listed on the regulated Euronext market in Paris since July 2014.
