CAD Designer

Our **Engineering** department is looking for a **CAD Designer**, who will be responsible for:

- Responsible for the preparation and organization of technical drawings for renewable energy projects (solar, hydro and wind);
- Preparation of documents related to conceptual and basic civil engineering projects in AutoCad: layout, drainage, earthworks, paving, signage, architecture and bill of quantities;
- Preparation of documents in Autocad related to conceptual and basic projects in electrical engineering: medium voltage networks, crossings, operational diagrams, substations, transmission lines, solar plants and bill of quantities;
- Assemble the project books ensuring the organization of all relevant documents and technical information;
- Technical assessment and support in Site Surveys.

QUALIFICATIONS:

- Technical degree in civil constructions;
- Minimum 4 years of experience in similar positions;
- Knowledge in renewable energy sector (preferential);

At Votalia we are passionate about **renewable energies!** We are an electricity producer from wind, solar, hydro and biomass, and also a service provider to 3rd party clients such as **Development, EPC, O&M and Distribution.**

Today we are in **17 countries, split among 4 continents,** and offering a **global operating capacity** to our clients. We are listed on the regulated Euronext market in Paris since July 2014.

Do you have the energy we need?
