Mechanical Engineer (F/M)

Our construction team in Kenya is looking for a skilled Mechanical Engineer who will monitor, support, and check the mechanical assembly of a structure on site.

You must have manual dexterity and great attention to detail but also be able to work with various machines and tools and follow all safety precautions.

Your main responsibilities will be dedicated to :

- the relationships with 2 service providers selected
- the inspection of machines, engines, and required diagnostic tests
- the inspection checks of the piles positions, and mechanical accuracy
- filling of the inspection forms and monitoring the staff and labor in charge
- evaluation of the installation rhythm to anticipate corrective actions
- other duties as assigned, keep logs of work and report on issues

Qualifications:

- Engineering school diploma; Certification from a vocational school or completion of apprenticeship
- Advanced MS Office skills
- Proven experience in mechanics or as Geometer
- Experience in the steel industry
- Driving license
- Languages: fluent in Kalingen & Swahili – professional in English

Personal skills:

- Knowledge of machinery, mechanics inspection, calibration process
- Aptitude in using various hand tools (screwdrivers, hammers etc.)
- Ability to follow established procedures and practices
- A strong commitment to all health and safety guidelines
- Very good communication skills, a problem-solving ability
